

Colline x Terrano.

Colline x Terrano

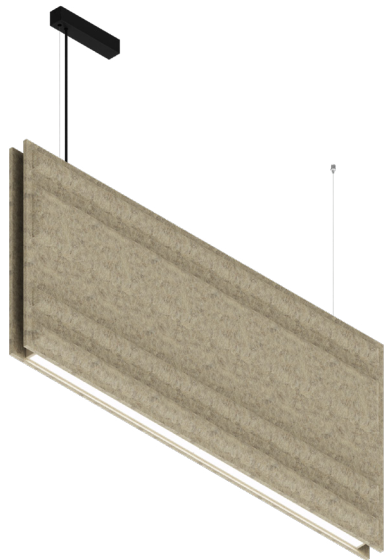

designed by Acustio team Aleksandra Mętlewicz, Mateusz Gaczkowski
& Lena Lighting Bożydar Milewski

*A multifunctional
acoustic and lighting
panel portraying
a unique design inspired
by nature and modern
art. Two in one as the
most utilitarian and
aesthetically pleasing
object which enriches
any kind of space.*

COLLINE X TERRANO

WORKS BEST IN: conference room, lounge room, waiting room, hall, open space.

Lamp

KEY CHARACTERISTICS

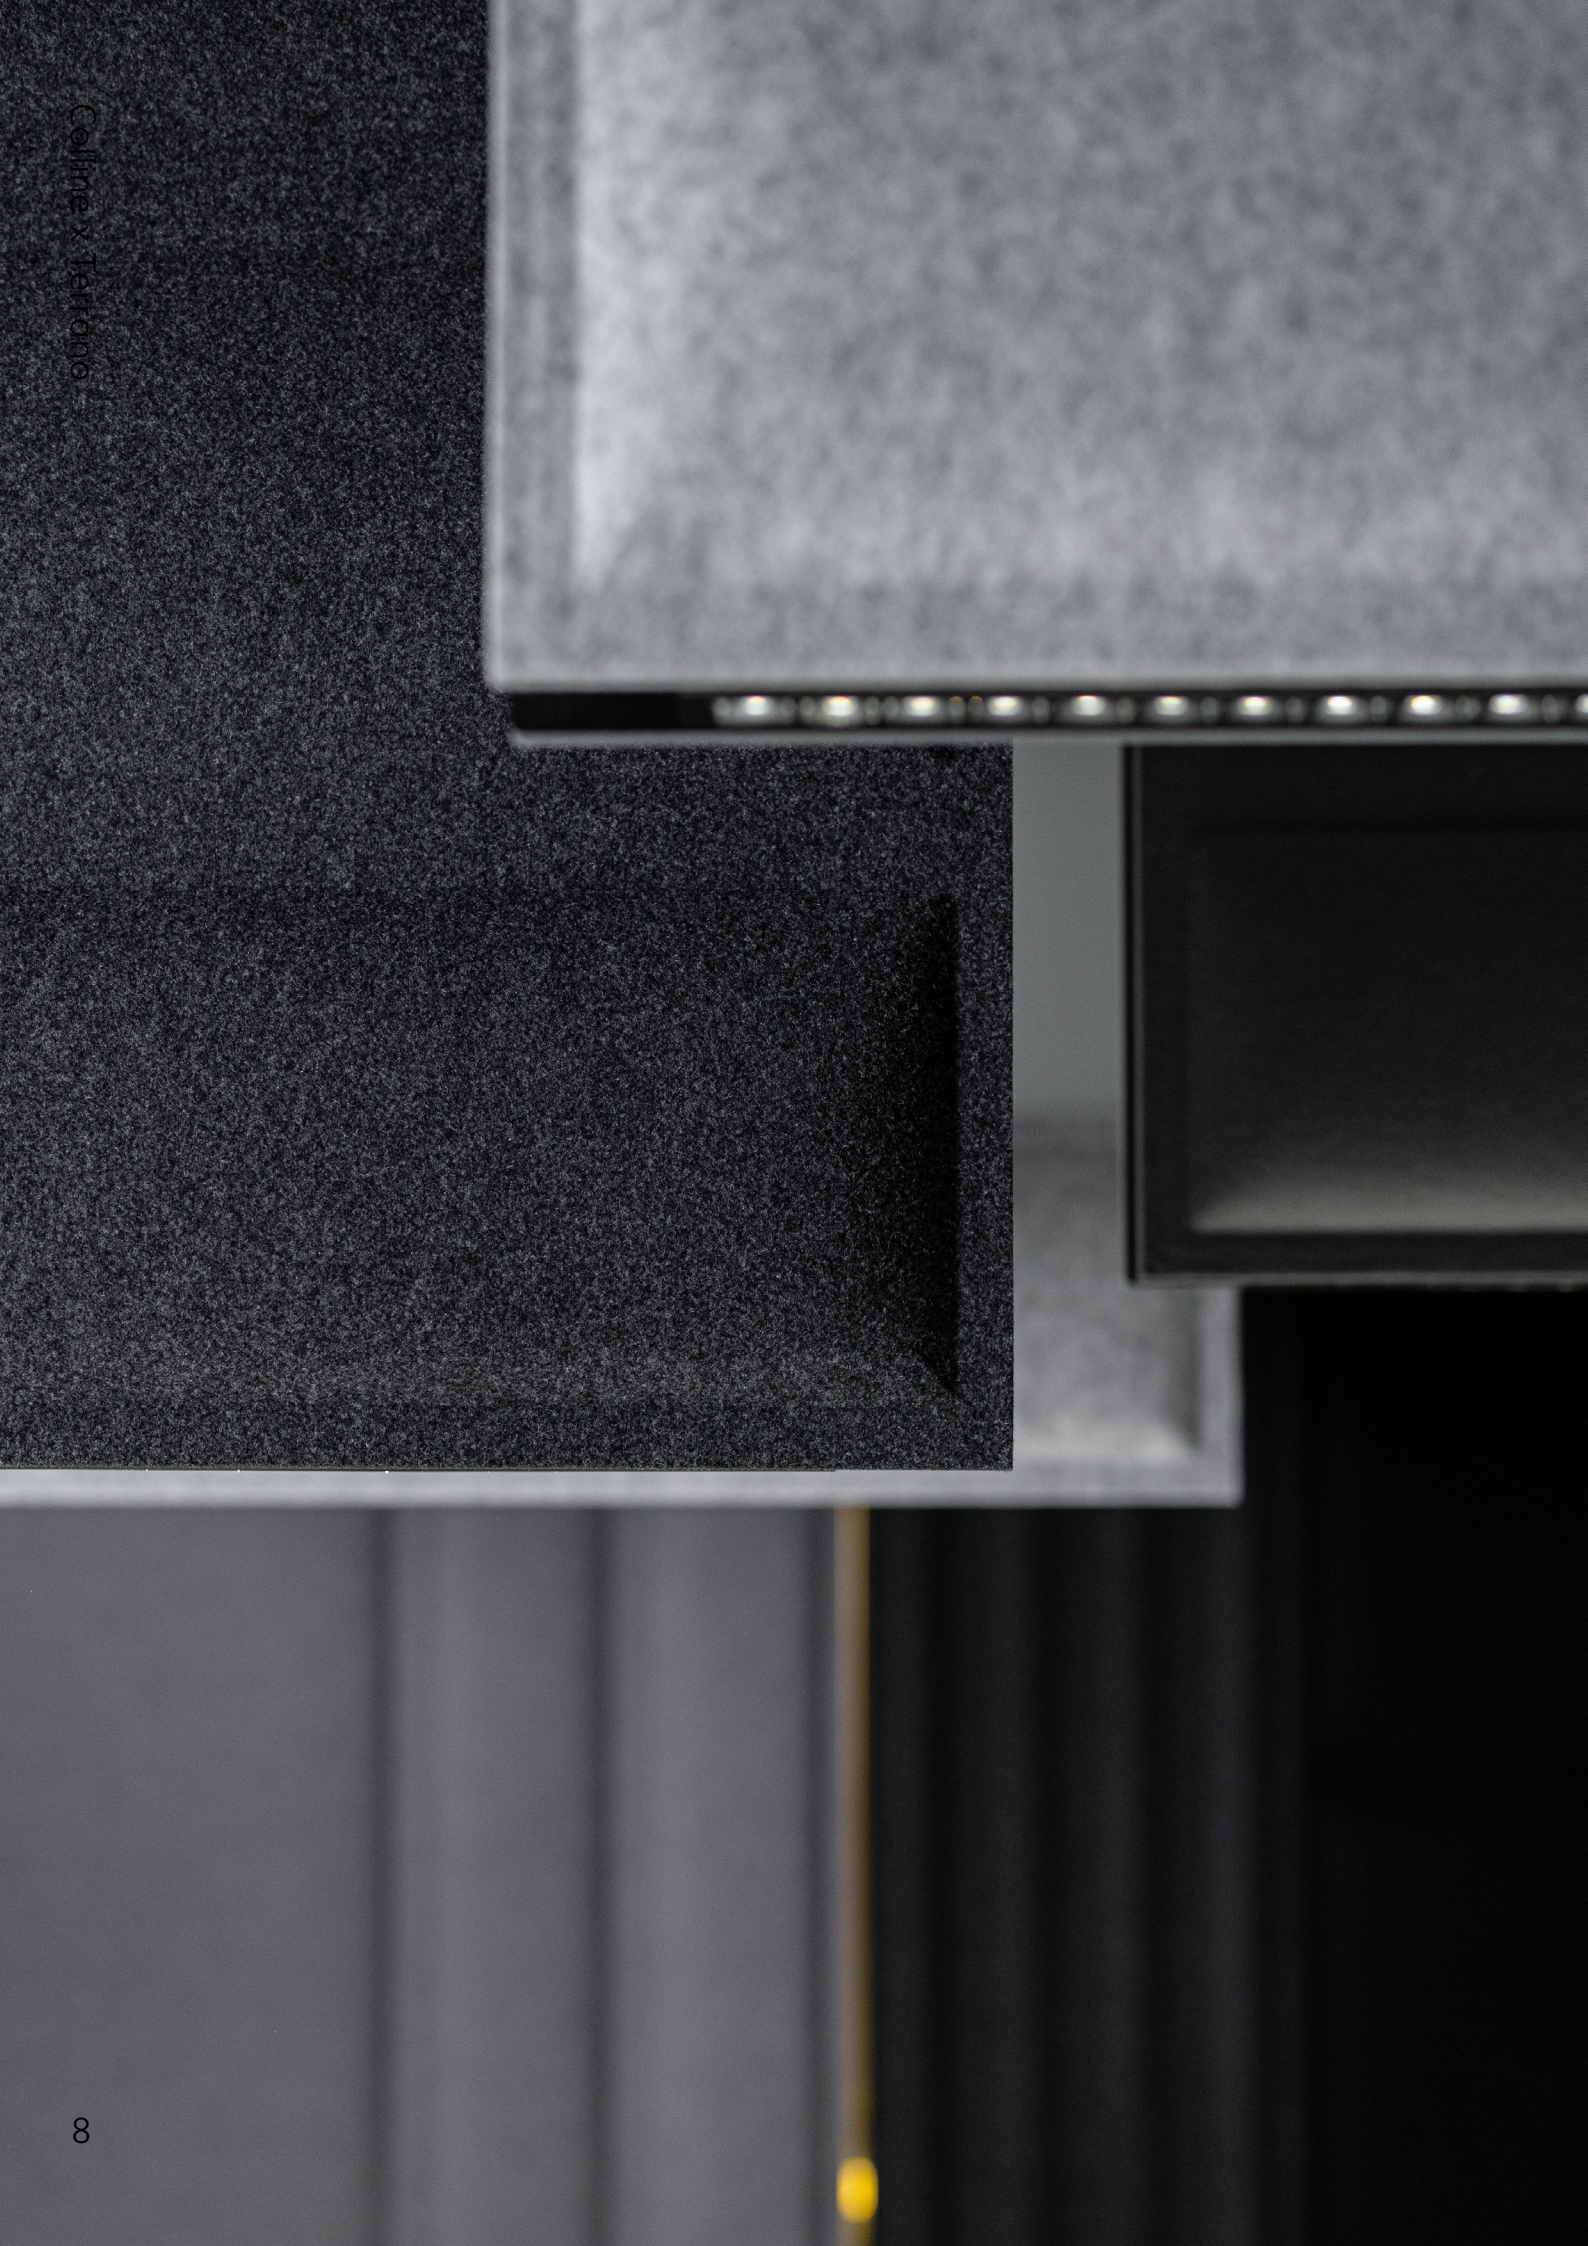

- Wide spectrum of choices while arranging. Different colours and type of felt or a RAL finish of metal elements enrich the personalisation process;
- The panel provides sensory-friendly lighting without the glare effect, while still keeping the high quality of sound insulation;
- The felt is three-layered, which makes the panel extra durable, soundproofing and soft at the same time;
- NanoFelt Ag technology implied if desired;
- The light is based on energy-saving (50%) LED modules that emit light in two colors 4000K or 3000K (on request). It is also available with DALI control, enabling the light to be set according to the outside conditions;
- The light can be controlled via a phone or a specially designed control panel for extra convenience;
- Colline x Terrano has already been awarded by the Red Dot: Product Design 2023 Award.

reddot winner 2023

*Designed to create spaces
favourable for both work
and rest time.*

FOLLOW YOUR VISION

A set of a few panels will work in offices and houses, creating a friendly environment for work, sleep and entertainment, providing impeccable acoustics and the lighting quality.

MODULAR AND ADAPTABLE

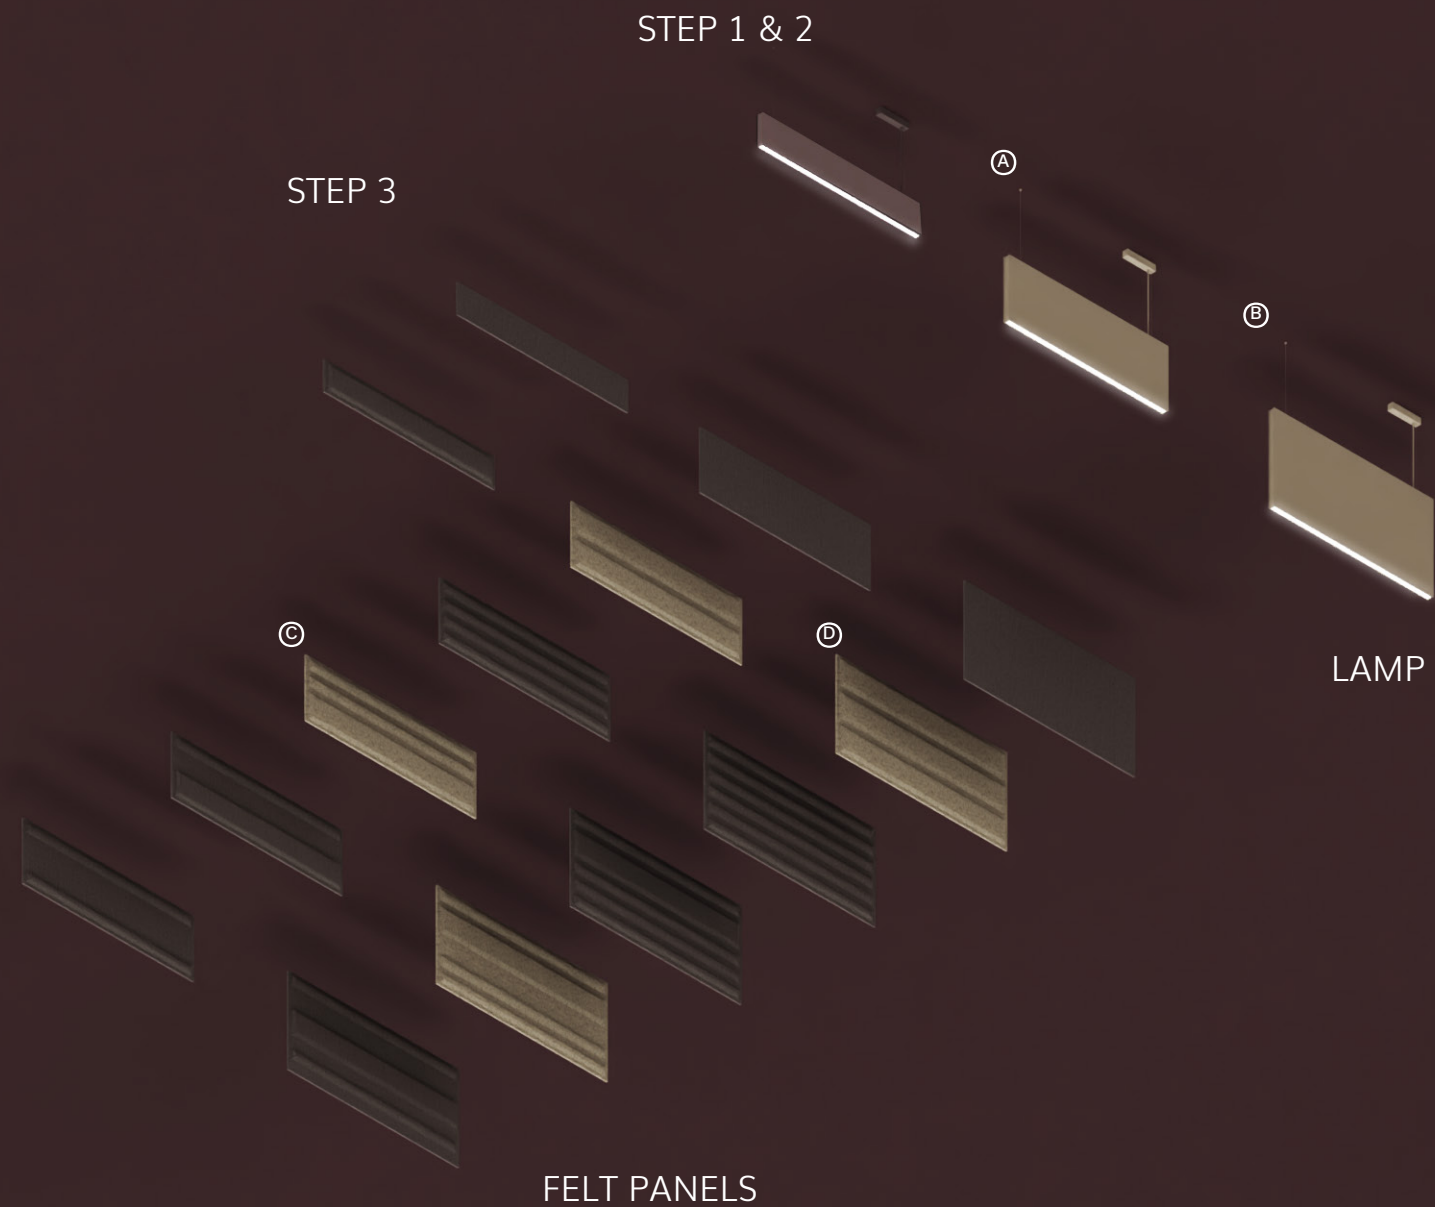

Different lengths, colours and patterns of the panels can evoke different experiences. Choose your perfect combination and pair it with the desired lighting to enhance every kind of room.

Program your individual settings of individual lamps and combine them into groups – all from the application in your phone or the control panel.

Design It Yourself

Channel your inner artist and plan your very own compositions of acoustic lamps. Put your vision to light.

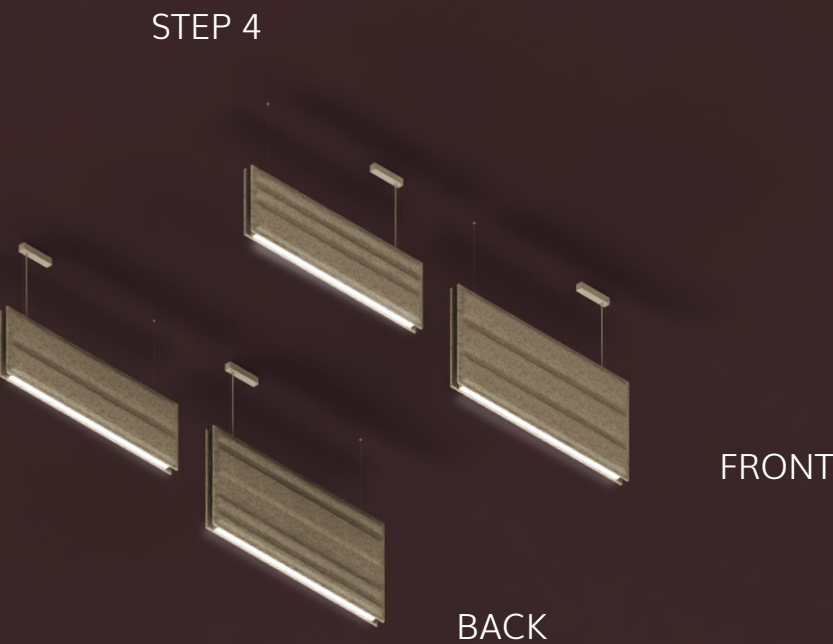

STEP 1
Choose a size of your lamp that fits your needs most - out of three different heights (20 cm/40 cm/60 cm).

STEP 2
Choose the desired technical parameters of your lamp and colours of its components.

- Ⓐ Remember to choose the right type of light for your space. If you need some support in that area, feel free to contact us. Our specialists will be more than happy to help.
- Ⓑ A structural element of the lamp is made of metal - choose its colour either from our basic colour palette or make it more extra with one of RAL hues.

- Ⓒ Choose from our 3D felt panel motifs and make your lamp composition unique.
- Ⓓ Choose a colour combination of your felt panels from 60 different hues. Both sides of the lamp can be different - colour and pattern wise.

STEP 3
Choose colours of the panels and a 3D motif - of both a front and a back (use our Colline family as your guide).

STEP 4
You've made it. Enjoy your very own acoustic lamp arrangement.
